Specialist Critical Care Transfer Trolley made to your specifications

CCT-PX is Ferno's latest enhanced Critical Care trolley, designed and built to individual requirements but configurable to ever-changing clinical needs, ensuring that all the medical equipment required for each patient transfer is safely attached to the trolley at all times. Feature-rich in design, your bespoke custom-made CCT-PX can be transformed in real-time according to the immediate needs of each transfer.

The trolley can even be configured to incorporate Bariatric capabilities, using the optional SX Surface eXtender cotsides.

Specialist equipment such as Balloon Pumps, ECMO machines and cooling/heating systems can also be accommodated at the time of design.

Ferno CCT-PX
Critical Care Transport Trolley

Overview

- **Designed to Specification** – Bespoke-made according to each individual's requirements, but with the flexibility to accommodate varying needs

- **Integrated Infection Control** - clean lines, wipe-clean pressure-reducing ABPR mattress, biosafe patient restraints and anti-bacterial paint surfaces all contribute to a high level of infection control and safety

- **Quick Configurability** – integrated trolley side-rail interface allows a host of options and accessories to be easily attached to the trolley

- **CEN Tested Safety** – dynamically tested and certified to EN 1789, compatible with Ferno's complete range of 2-Part Locking Systems

Ferno's CCT-PX comes with the most advanced range of features and configurable options ever developed in a Critical Care Patient Transfer trolley

Specifications

LENGTH (fixed)		1970 mm
HEIGHT (fixed)	To the underside of the mattress	825 mm
WIDTH	Normal	570 mm
	SX Cotsides for Bariatrics	920 mm
Load Limit (SWL)	Patient*	250 kg / 40 st
WEIGHT	Mattress and restraint not included	69 kg**

*Maximum equipment weight dependant on trolley configuration

** Standard mass (weight dependant on final configured specification)

CCT-PX Baseline Features

- Pole mounts to hold medical equipment
- Side-interface for attachment of accessories
- Olson 12-gang Power Distribution Unit
- 2 * E-size cylinder holders (with CD adapter)
- Lateral-folding cotsides (option of SX cotsides)
- Black webbing 'Cross-strap' patient harness

- Anti-Bacterial Pressure-Reducing mattress
- Detachable adjustable winged headrest
- Adjustable backrest & leg position platform (Trendelenburg, Shock & Knee Contour)
- Stowable foot-end Push-poles (2)
- Brakes on all 4 wheels

- Anti-static wheel
- Bump wheels on all 4 corners
- Backrest monitor hook
- Winch connector for loading in vehicle

- **Vertical Fixing Poles** For attachment of pole-clamped medical devices

- **E-size Cylinder Holders** Holds E size cylinders and also CD size with supplied adapter kit

- **Lateral-Folding Cotsides** Simply fold down when transferring a patient

- **Adjustable Winged Headrest** Providing comfort and adjustable to different size patients

- **Power Distribution Unit** Easy and safe supply of power for all the medical devices
